

NEFLETRON

Specific Protein Analyser

The Nefletron is a point-of-care immunofluorescence system designed for small and medium sized laboratories that require serum protein and HbA1c analysis. With no calibration required, the Nefletron fully utilises its reagents offering the maximum number of patient samples. The instrument is capable of performing 12 different assays with minimal user input.

Analyser Specifications

Light source - LED
Wavelength - $365 \pm 10 \text{ nm}$
Test method - Immunofluorescence
Reagent card - Disposable
Power - $\leq 50 \text{ VA}$
Work type - Continuous operation equipment

Parameters tested:

HbA1c	CYS-C	D-Dimer
CRP (high sensitivity)	RF	IgA
SAA	CCP	IgG
mALB	ASO	IgM

Instrument Dimensions - 30 x 27 x 16 cm – 4kg
